

I hope this message finds you well.

I'm writing to express my interest in a position where I can bring value as a Full Stack Software Engineer. With a strong foundation in both frontend and backend development, I've had the privilege of contributing to diverse and impactful projects across organizations such as Averox Software, COMSATS Cyberlab, and Cytomate.

At Averox Software, I sharpened my skills in scalable software design, working on enterprise-level applications with real-world impact. At COMSATS, I expanded my expertise as a Cyber Engineer, focusing on research-driven development with an emphasis on secure systems. Currently, I'm working with Cytomate, a cybersecurity startup based in Qatar, where I build full-stack solutions using modern JavaScript technologies including React, Node.js, TypeScript, and Redux Toolkit.

My approach to development blends performance, security, and usability, and I enjoy building systems that are both efficient and user-friendly. More than anything, I value learning, collaboration, and writing clean, maintainable code.

Thank you for considering my application. I would love the opportunity to further discuss how my background and interests align with your team's goals.

Warm regards,
Waseem Javed
