Education

Master in Information Security

Sep 2025 - Sep 2027

Riphah International University, Islamabad

Pursuing a Master's in **Information Security** with a focus on **red** and **blue** team operations, **SOC analysis**, and cyber defense. Skilled in **penetration testing**, **incident response**, and **malware analysis**. Experienced in **reverse engineering** and **exploit development**. Passionate about bridging **offense** and **defense** to build stronger, smarter security systems.

Bachelor in Computer Science

Sep 2016 - Nov 2020

University of Swabi, Swabi

Bachelor of Science in **Computer Science** with a solid foundation in **programming**, **algorithms**, and **software development**. Proficient in **Python**, **Java**, **C**, and **C++**. Experienced in building efficient, scalable solutions and skilled in **data structures**, **databases**, and **web development**. Knowledgeable in computer networks, operating systems, and **cybersecurity** fundamentals.

Fsc (Intermediate-Annual)

Jul 2016

Jinnah Model School & College Zaida, Swabi

I completed my Fsc in Pre-Engineering, building a strong foundation in subjects like mathematics, physics, and some major subjects as well. This background has equipped me with analytical and problem-solving skills essential for technical fields.

Matric (Secondary School Certificate-Annual)

Jun 2014

Jinnah Model School & College Zaida, Swabi

I completed my SSC in Science, focusing on core subjects like mathematics, physics, and chemistry. This provided me with a solid understanding of scientific principles and a strong base for further studies in technical disciplines.

Experience

Research & Development Manager

Oct 2024 - Present

Smartdealer, Islamabad

At **SmartDealer**, I work as an R&D Manager, focusing on exploring new ideas and technologies to help improve our products. I lead the research process, test out new concepts, and work closely with the team to turn those ideas into real features that support the company's goals. [SmartDealer.pk](#)

Software & Cyber Security Engineer

Oct 2024 - May 2025

Averox, Diplomatic Enclave, Islamabad

At **Averox**, I worked as a Software and Cybersecurity Engineer, contributing to the development of a **real-time messaging and video calling application** for both **mobile and web platforms**. My role included full-stack development as well as **penetration testing** of open-source web applications, such as **Web Element**, and mobile apps to identify and mitigate security vulnerabilities.

Full Stack Engineer

Jun 2022 - Sep 2024

APT (Breach+), Cytomate, Doha, Qatar

At **Cytomate**, I work as a Full Stack Engineer using **React**, **Node.js**, and **TypeScript** across three cybersecurity products: **Breach+**, **Sarab**, and **ASM**. I've been involved in developing secure, modular APIs and building intuitive frontend interfaces within a **microservices architecture**. Additionally, I contributed to the development of a desktop agent using **Electron.js**, designed for secure session isolation and offline job execution. My responsibilities include backend API development, frontend UI implementation, and integration of automation logic through dedicated **cron job** services and a separate **Python** based automation servers. [Cytomate.net](#)

Full Stack Engineer

Jun 2021 - May 2022

Comsats (Cyber Lab), Islamabad

Working as a Full Stack Engineer in the Research and Development team at **COMSATS** University, where I contribute to building web applications and assist in research-based projects. I also present and demonstrate developed solutions as part of the academic and innovation process.

Experience Areas

- SOC Analyst
- Security Analyst
- Penetration Testing
- Malware Analysis
- Malware Development
- Exploit development
- Reverse Engineering
- Vulnerability Assessment and Penetration Testing

React Native Developer

Mar 2021 - May 2021

Reap Agro, Swabi, Pakistan

In reapagro as a **react native developer** to develop a mobile application for agriculture crops management. Reap Agro is working to improve the lives of small holder farmers by providing timely interest-free financing to support and facilitate them, in the form of inputs and easy credit. Overcoming poverty one farmer at a time, we aim to enable them by decreasing cost, improving yield and managing disasters through our advisory and technological channels.

Web Developer

Feb 2019 - Apr 2019

University of swabi, Pakistan

CONFERENCE SUBMISSION SYSTEM (CSS) to provide a platform for researchers and industry practitioners to share their innovations, ideas, research results and development experiences in different fields .registered people can check the status of paper further information check the website yourself link is given below.

Programmer

Aug 2018 - Oct 2018

Army Service Crops, Nowshera

I'm working on a desktop application for the Army Service Corps to help manage plots within their colony. This tool will centralize plot-related information, making it easier to register new plots, track maintenance, and manage resident records.

Events Certifications

- University of Swabi - Workshop Based On Software Application In Search, Certified - Date: May 2017
- Capital University of Science & Technology - 7 Excite Cup Competition 2018
- University of Swabi - Workshop Based On Software Application and Workshop Based On Cyber Security In Search, Certified - Date: Jan 2018

Awards

Advent of Cyber 2023 (Try Hack Me)

Jan 2024

Certified in Advent Cyber 2023, gaining hands-on experience in cybersecurity practices, vulnerability assessment, and penetration testing. The certification showcases my ability to identify security risks, develop mitigation strategies, and enhance system defenses.

Certified Ethical Hacker (ehunar)

Sep 2024

Certified Ethical Hacker (CEH) from eHunar, demonstrating expertise in identifying vulnerabilities, conducting penetration testing, and implementing effective security measures to protect systems from cyber threats. This certification validates my skills in ethical hacking and cybersecurity best practices.
